## Safety Tip of The Month

### Don't Use Your Phone While Riding

Leave your phone in your pocket when riding your bike. That's where it belongs. Cycling and using your phone is just as dangerous as driving a car with a phone in your hand.

It will significantly decrease your attention and focus and increase your chances of making a mistake or not seeing potential danger fast enough. If you need to use a phone, stop and move off the road, and then do it.
